

Our Objective

1. Strengthen teacher education

Provide practical strategies, lesson plans, and pedagogical models that empower teachers to integrate interreligious dialogue into climate change teaching.

2. Advance interreligious understanding

Encourage teachers and students to explore how various religious traditions frame environmental ethics, fostering respect and dialogue across faiths.

3. Support climate literacy

Equip educators with scientifically grounded knowledge about climate change, while connecting it to ethical and spiritual perspectives.

4. Promote intercultural exchange

Showcase diverse best practices from multiple countries, highlighting how different cultural and religious contexts approach climate change education.

5. Provide adaptable teaching materials

Offer resources using didactic approach that can be contextualised for different educational systems, age groups, and cultural settings.

6. Foster collaborative pedagogy

Promote teaching approaches that emphasise dialogue, group projects, and community engagement across religious and cultural boundaries.

7. Encourage critical reflection

Help teachers guide students in examining their own beliefs and values in relation to sustainability, ethics, and interreligious cooperation
